CAREER OBJECTIVE

Detail-oriented, Result-driven and certified Software Developer with 7+ years of experience in designing, developing, and deploying scalable integration solutions using MuleSoft Anypoint Platform.

Seeking to leverage my expertise in API-led connectivity, system integration, and cloud-native architecture to contribute to innovative enterprise solutions. Eager to join a forward-thinking organization where I can grow professionally while driving digital transformation through robust integration strategies aligning with the organization objectives.

TECHNICAL SKILLS

Database: MySQL | NoSQL | Oracle | PostgreSQL

Front End: JavaScript | Angular JS | TypeScript | Python | HTML 5 | CSS 3

Back End: Python | Java (OOB) | PHP | .NET Core | SQL | C# | AEM | Jenkins

API Design & Integration: MuleSoft | Boomi | TIBCO | .NET | HL7 2.x

Project Management Tools: JIRA | Git | GitHub | Slack

CRM Tools: Salesforce | Microsoft Dynamic 365

Others: Mule ESB | API Gateway | API Management | iPaaS | SharePoint | Okta |

CI/CD | Mavens | Azure DevOps | AWS Basics

SOFT SKILLS

Visionary Leadership & Development |

Work Ethics & Trustworthy | Customer Relationship Management |

Effective Communication & Persuasion | Adaptability to Evolving Needs |

Initiative | Team Handling | Collaborative Mindset & Stakeholder Engagement |

Organizational Growth | Critical Thinker | Solution-Oriented

ACHIEVEMENTS

- Successfully delivered 6 complex projects in 4 months
- Successfully delivered 4 projects effectively in government and petroleum industry
- Created custom scripts for password encryption and decryption, improving system security and reducing the credential exposure risk.
- Streamlined complex logic to enhance code performance, improving maintainability and system responsiveness.
- Managed end-to-end UAT to production release process with 0 (zero) post deployment issue

EXPERIENCE

Pernix Pty Ltd.   *Full Time | Adelaide*
Senior Integration Developer   *November 2023-Present*

- Designing and developing APIs using MuleSoft Any point Platform to integrate electoral systems with external applications, ensuring seamless data exchange.
- Implementing advanced data transformation techniques using Data Weave to map, process, and normalize data across multiple platforms.
- Migrating legacy integration systems to MuleSoft Cloud Hub, minimizing downtime and ensuring robust performance.
- Ensuring secure data handling by implementing OAuth 2.0, encryption standards, and compliance with government regulations.
- Utilizing MuleSoft monitoring tools to optimize API performance, troubleshoot issues, and enhance system reliability.
- Collaborating with stakeholders and cross-functional teams to gather requirements and deliver scalable integration solutions.
- Conducting rigorous unit and integration testing to validate the functionality, security, and performance of APIs.
- Preparing comprehensive technical documentation to support maintenance and future development efforts.
- Supervising team of 4 direct subordinates.

Department for Education   *Full Time | Adelaide*
Integration Developer   *October 2022 – September 2023*

- Integrated student data from a database to API, Salesforce, Whispir and Okta, ensuring that data is accurate and up to date across all platforms
- Designed and developed custom MuleSoft connectors to integrate with various external systems and data sources
- Created and maintained technical documentation for integration solutions, providing invaluable insight and guidance to stakeholders and team members alike
- Proficient in development and project management tools such as Git, JIRA, Jenkins, Eclipse, and Visual Studio Code
- Familiarity with databases such as MySQL, Oracle, and PostgreSQL

- Delivered high-quality integration solutions that meet the evolving needs of the organization
- Successfully designed and implemented integration solutions, collaborated with cross-functional teams, and maintained and enhanced existing solutions
- Possess exceptional technical acumen, attention to detail, and dedication to achieving organizational objectives

ACET Global Pty Ltd *Full Time | Adelaide*
Integration Developer *November 2019 – October 2022*

- Developed and re-engineered Geelong Football Club's NetSuite interface using Mule 3 to migrate to MuleSoft 4
- Designed RAML for implementing REST APIs through utilization of MuleSoft Any point API Platform
- Steered the connection of integration flows with REST, SOAP service, Oracle Database, and ActiveMQ broker using Mule Any point Studio
- Created Mule Flows using End Point Connectors and components using the Mule ESB to integrate client/server systems
- Diligently worked with the QA, Business and Architects to solve the defects in quick and fast to meet the deadlines
- Create RAML specifications in Any point Platform and use fragments such as Resource types, Traits and Library to enable reusability
- Create the flows that provide and consume services (SOAP & REST)
- Prepared User stories corresponding to the features taken from Backlog
- To understand customer requirements and developing the functionality specific Business, Application and to integrate it with the product
- Improved functionality by updating old code bases to modern development standards, leveraging Java expertise
- Ensured client satisfaction by delivering projects on strict schedules and providing systematic communication of project status and key milestones
- Streamlined workflow efficiency by utilizing critical thinking skills, decisive judgment, and working with minimal supervision
- Demonstrated strong Java experience and proficiency in programming language, frameworks, and libraries

Digital Solutions Galaxy *Full time, Sydney, NSW*
Website Developer **May 2017 – October 2019**

- Prevented viruses, spyware, and identity theft as well as protected valuable information by designing and executing security measures, such as firewalls and encryption
- Steered the development and implementation of AEM software through collaboration with company leadership
- Delivered exceptional services to customers and managing challenging situations with ease

- Debugged and verified software performance, running unit, system, integration, and user interface testing.

EDUCATION

Bachelor of Science: Software Engineering   **July, 2020**
Kent Institute Technology, Sydney, NSW

Diploma of Business: Business   **June, 2020**
Sydney, NSW

LICENSES & CERTIFICATIONS

- MuleSoft Certified Developer
- Microsoft Certified Technology Specialist: SQL Server 2008 Database Developer
- Boomi associate developer certification
- Professional API Design
- Professional Integration Developer
- Machine Learning / AI Certificate
